

At Pablo, we firmly believe in the transformative power of light within any setting. Our mission is to deliver enduring solutions that illuminate spaces for a lifetime.

- **Sustainable Practices:**

We view sustainability not merely as a choice, but as a vital responsibility. At the core of our business ethos lies a commitment to environmental stewardship, social accountability, and economic progress. Our efforts are guided by these principles, driving us to:

- **Minimize Our Environmental Impact**

We innovate to reduce waste, cut carbon emissions, and conserve natural resources. Embracing energy efficiency and renewable energy sources across our operations is fundamental to our approach.

- **Foster Social Well-being**

We ensure a safe, inclusive, and fair workplace for all employees. By investing in community development and supporting local initiatives, we uphold rigorous standards of human rights and labor practices.

- **Promote Sustainable Growth**

Sustainability is integrated into our business strategy to nurture lasting value for stakeholders. We prioritize ethical conduct, transparent reporting, and sustainable sourcing throughout our supply chain.

All Pablo Design Products are Designed with Sustainability in Mind:

- They ship flat-packed to minimize space wastage.
- All products are designed for maximum performance and employ the most advanced energy efficient state of the art light technologies available in the market.
- They are designed to push the boundaries on minimizing material use whenever possible employing a “Less is More” philosophy and practice
- They are free of hazardous materials such as mercury.
- Where possible, they incorporate natural, sustainable materials like FSC® Woods.
- They are designed for disassembly after use to facilitate recycling.
- They are engineered for maximum user serviceability to extend their lifespan.
- Up to 97% of their materials are recyclable.
- They are RoHS, UL, ETL, and CE and WEEE Certified.
- They are manufactured in ISO14001 Certified factories, utilizing an Environmental Management System to reduce their Carbon Footprint and Environmental Footprint (Certificate available on request.)

Our journey toward a sustainable future is ongoing, and we are steadfast in our commitment to making a lasting impact. Together with our employees, partners, and communities, we strive to build a better world for future generations. Products are designed for maximum performance and employ the most advanced energy efficient state of the art light technologies available in the market.
